

Elliot Clowes

Whether it's building a home weather station to analyse weather data or developing a habit-tracking website for individuals with ADHD, I love leveraging technology to solve problems and create *things*. Technology is my lifelong, burning passion, but I also like photography, organising hikes, and just learning about the world.

Summary

My career trajectory has often been at the intersection of people management and project organisation. Most recently I was a Manager at Ocado, where I juggled numerous challenging tasks including driver supervision, delivery route assignment, fleet management, and data analysis. It was a role where communication was key, requiring liaising with various internal teams to ensure smooth operations and reaching objectives.

Currently I am transforming my lifelong passion of technology into a career and am a Tech Trainee at La Fosse Academy. I enjoy working with data *and* people and I'm open to diverse opportunities within the world of technology. And I feel that my background of managing people and organising projects combined with my technical proficiency mean I can be a useful and positive team member.

Work experience

La Fosse Academy | Tech Trainee | 2023/05 – 2023 Present

- 12-week intensive training covering key topics in the tech industry, including web development, architectural thinking and infrastructure.
- Completed team projects working to Agile principles.

Ocado | Regional Development Team Manager | 2018/09 – 2023/05

- Part of a team supervising several hundred drivers via meetings, remote monitoring and front desk interaction. All whilst ensuring any company concerns or feedback are effectively communicated to employees.
- Dealing with employee issues such as performance, personal conflicts, attendance and work rotas in a positive, proactive manner.

Mannox | Operations Manager | 2013/12 – 2023/09

- Coordinating staff and equipment for often unique and large shop fitting projects via utilisation of in-house software and liaising with third-parties.
- Dealing with often large, FTSE 100 clients in a professional manner.

BFI National Archive | Digital Archivist | 2009/08 – 2013/12

- Using familiarity of film history to add metadata to undocumented digital scans.

Education

University of Roehampton | 2013-2016

- BA Photography and Philosophy (did not graduate)

Oaklands College | 2009-2011

- BTEC Level 3: Extended Diploma in Art & Design

Cavendish School | 2003-2008

- 6 GCSEs including Mathematics, English, I.T., and Science
